Dear Colleague, We would like to invite you to participate in the 2002 NSF/NBER Conference on Decentralization. The conference will be held at Georgetown University, April 19-21, 2002. Local organizers are Roger Lagunoff and Luca Anderlini. All economic theory papers dealing with decentralization issues are invited for submission. Whenever possible, will try to organize sessions consisting of papers focussed on similar topics. We especially encourage submissions of papers on: 1. Dynamic models of political/collective choice mechanisms 2. Social norms 3. Endogenous incompleteness of contracts Also, please feel free to recommend a paper that we should solicit. Information regarding submissions, and all future announcements on local arrangements can be found on the conference web site.
