Call for papers: Models of Monetary Economies II: The Next Generation In 1978, John Kareken and Neil Wallace of the University of Minnesota organized a conference on monetary economics at the Federal Reserve Bank of Minneapolis called, "Models of Monetary Economies." On May 21-22, 2004, the Federal Reserve Bank of Minneapolis and the University of Minnesota will host a follow-up conference, "Models of Monetary Economies II: The Next Generation". The agenda for the conference is described in its title: to present the latest developments in theoretical monetary economics. To that end, the conference will contain the latest and best work from all theoretical approaches to monetary economics For further details on the conference and on how to submit a paper, see the call for papers at <http://www.stanford.edu/~nkocher/kocherwright/>. Narayana Kocherlakota, Randall Wright
