Effects of global financial crisis on turkey [küresel finans krizinin türkiye'ye etkileri]

Aykut Kibritçiođlu
Ankara University

Abstract

Following the US financial crisis of 2006-2007, the global economy suffered from negative spillover effects of it since fall 2008. In this study, the effects of global financial crisis on Turkish economy (2008-2010) and the macroeconomic performance of the Turkish government (before and) during the crisis (2005-2010) are briefly discussed.
